OBJECTIVE

Motivated 2nd-year Computer Science and Engineering student with a strong foundation in modern programming languages and web development. Passionate about tackling daily coding challenges, building responsive applications, and continuously expanding technical expertise through intensive courses and practical projects.

EDUCATION

Vardhaman College of Engineering

Bachelor of Technology (B.Tech) in Computer Science and Engineering

- Current Status:** 2nd Year, 3rd Semester
- CGPA:** 8.90 / 10

TECHNICAL SKILLS

- Languages:** Modern C++, Java, Python, JavaScript, SQL, HTML5, CSS3
- Tools & Platforms:** GitHub, VS Code, Google AI Pro
- Core Competencies:** Data Structures & Algorithms, Responsive Web Design, Object-Oriented Programming, API Integration

PROJECTS

Personal Portfolio Website

- Designed and deployed a fully responsive modern portfolio using HTML5, CSS3, and JavaScript.
- Implemented interactive elements including dark/light theme toggling and scroll-triggered animations.

Weather Application

- Built an interactive weather forecasting application utilizing real-time API integrations.
- Developed features for location searching and dynamic rendering of UI components.

Task Management App

- Created a feature-rich To-Do application with local storage persistence.
- Integrated state tracking for task completion, deletion, and robust filter functionality.

CERTIFICATIONS & CONTINUOUS LEARNING

- **Programming in Modern C++:** Completed a 12-week intensive course, earning an official E-Certificate.
- **SWAYAM Portal Courses:** Enrolled and completed specialized 12-week technical coursework.
- **AI-Focused Startup School:** Participated in an intensive entrepreneurial and AI development program.
- **Competitive Programming:** Maintain an active daily problem-solving streak on LeetCode to sharpen algorithmic and logical reasoning skills.
